

Dear Parents,

We are going to start a unit on Plants and Life Processes in Science. One of the activities we hope to do will involve plant seeds. During the unit we hope to use a collection of seeds for an activity involving physical characteristics, but we need your help. Each student is asked to bring in donations of seeds. The seeds can be from edible (fruits and vegetables) and non/edible plants (flowers). Please help the class by sending in a packet or two of seeds by Friday, March 30<sup>th</sup>. We hope to use them immediately following Spring Break.

Thank you for your help and donations!  
Ms. Thoresen and Mrs. Kindley
